

Time travel 2020 with Bach in Moss

A 300-year time travel in the cultural landscape of Rygge and the urban Moss

A musical and literary thread is twisted around important historical buildings in Rygge and Moss, and during 6 cultural events in one day in 6 different places, some of the story of Moss and Rygge is told.

Giving a sense of a 300-year time travel in history - in one day - that also points back to earlier times when the pilgrimage road played an important role. The music is shaped by various national and international violinists in interaction with the history and aesthetics of the buildings - which provide the premises for which musical expressions are chosen, from Baroque to modern electric violin.

One of mankind's great artistic testament is Bach's 6 solo sonatas and violin partitas, which were written in 1720 during his time as in Köthen - the same year that Moss gained its status as a city.

In addition to Bach as the red thread, there will be music that represents the various eras and literary considerations of eras and history.
